Households with individuals 65 years and over	1,545	20.6%

Average household size	2.93	(X)
Average family size {7}	3.27	(X)

Notes:

X = Not applicable

{6} - "Spouse" represents spouse of householder. It does not reflect all spouses in a household. Responses of "same-sex spouse" were edited during processing to "unmarried partner".

{7} - "Family households" consist of a householder and one or more other people related to the householder by birth, marriage, or adoption. They do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same-sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption. Same-sex couple households with no relatives of the householder present are tabulated in nonfamily households. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.
